SS SERIES · HEAVY BOMBERS

Pulsar SS102

SS102 battery for heavy bomber drones

Specifications

Voltage	**22.2 V (6S)**
Capacity	**102 000 mAh**
Energy	**2 264 Wh**
Weight	**≈ 6 kg**
Cell energy density	**380+ Wh/kg**
Chemistry	**Semi-Solid State NMC**

Pulsar SS102 is built for heavy FPV bombers and strike UAVs that need a larger energy reserve for payload, optics, communications or extra equipment.

Recommended for platforms where the SS82 is too small and the SS120 would be too heavy.

Features

- Semi-solid-state chemistry — 380+ Wh/kg at cell level
- Optional impact-resistant aluminium housing with IP65 protection
- QR batch traceability for quality control
- Customisable: BMS, connector, cable length, mounting points

PRICE

from 50 000 UAH (≈ $1,110)
